

Flexle Privacy Policy

Effective date: August 26, 2026

This privacy policy applies to the Flexle app for mobile devices (the "Application"), together with any related services, operated by Liam Taylor (referred to in this policy as "we," "us," or the "Service Provider"). This policy explains what information the Application collects, how it is used, who it may be shared with, and the choices available to you.

1. Information Collection and Use

The Application collects certain information automatically when you download and use it. This may include:

- Your device's Internet Protocol (IP) address
- The screens of the Application you visit, and the time and date of your visit
- The amount of time spent using the Application
- Your device's mobile operating system and version

This information is used to operate, maintain, and improve the Application, and to understand how it is used.

2. iCloud Data Sync

The Application uses Apple's iCloud Key-Value Store to synchronise your local gameplay progress across devices signed in to the same Apple ID. The following data may be stored in iCloud and shared across your devices in this way:

- Game history and results
- Experience points (XP) and level progress
- Hint balance
- Application preferences, such as whether you have completed the onboarding tutorial
- Daily Word completion status and streak

This data is stored securely within Apple's iCloud infrastructure and is governed by Apple's own Privacy Policy. It is not accessible to the Service Provider. You can disable iCloud sync for Flexle at any time by going to Settings → [Your Name] → iCloud → Apps Using iCloud, and turning off Flexle. Disabling iCloud sync will not delete data already stored locally on your device.

3. Friends, Groups & League Tables

Flexle offers optional social features — adding friends, creating or joining groups, and comparing performance on League Tables. These features are powered by a separate backend service (see Section 10, "Third-Party Service Providers") and

involve a different kind of data handling than the rest of the Application, described in full below.

3.1 Anonymous Device Identifier

When you first use the Friends feature, the Application generates a random identifier for your device. This identifier — not your Apple ID, name, or any other personally identifying detail — is used to associate your gameplay data with your device on our backend.

3.2 Information Stored on Our Servers

If you choose to use Friends, Groups, or League Tables, the following information is sent to and stored on our servers:

- Your anonymous device identifier
- The display name you choose
- An 8-character code used to identify your profile to friends
- Your current streak, most recent Daily Word result, and total XP/level
- Any friend connections you make, and any groups you create or join

3.3 Information Visible to Other Users

If you add friends or join a group, the following information about you becomes visible to those other users: your display name, level, current streak, and Daily Word performance (including League Table rankings). Your device identifier, short code, and (if provided) recovery email are never shown to other users.

3.4 Optional Recovery Email

You may optionally provide an email address so that your Friends profile, friend connections, and group memberships can be restored if you delete and reinstall the Application. If provided, this email is verified with a one-time code before being stored. It is used solely for account recovery, is never shown to other users, and is never used for marketing. You can add, change, or remove this email at any time from Friend Settings within the Application.

3.5 Retention & Deletion

Unlike the rest of the Application's data (which lives only on your device or in your own iCloud account), Friends/Groups data is stored on our servers independently of your device, and is not automatically deleted if you uninstall the Application. You can leave any friend connection or group at any time within the app. To request full deletion of your Friends profile and all associated data, contact us using the details in Section 17.

4. In-App Purchases

The Application offers optional in-app purchases, including hint packs, to enhance gameplay. All purchases are processed entirely by Apple through StoreKit. The Service Provider does not collect, see, or store your payment details, card numbers, or billing information — this is handled exclusively by Apple in accordance with Apple's own Privacy Policy. The Service Provider only receives confirmation that a purchase was completed, which is used to unlock the relevant content (e.g. additional hints) on your device. Purchase history may be included as part of Apple's standard App Store transaction records, which are governed by Apple's own policies.

5. Notifications

With your permission, the Application may send local notifications — for example, a reminder if you have not yet played that day's Daily Word puzzle. These are scheduled entirely on your device using Apple's notification framework and do not involve sending any personal data to our servers. You can adjust or disable notification permissions at any time in your device's Settings, or from within the Application.

6. Advertising & Analytics

The Application uses Unity LevelPlay to display advertisements and to gather basic, non-identifying analytics about how the Application is used. Flexle does not use Apple's App Tracking Transparency framework, does not request permission to track you across other companies' apps or websites, and does not access your device's advertising identifier (IDFA) for cross-app tracking purposes. Any advertising shown is served using privacy-preserving, non-tracking methods (such as Apple's SKAdNetwork).

Unity LevelPlay's own privacy policy: <https://unity.com/legal/game-player-and-app-user-privacy-policy>

7. Your Rights

Depending on where you live, you may have the right to request access to, correction of, or deletion of personal information we hold about you. To exercise any of these rights, contact us at lpt_studio@icloud.com.

8. California Residents (CCPA/CPRA)

If you are a California resident, you have the right to know what categories of personal information we collect, to request deletion of that information, and to opt out of any "sale" or "sharing" of personal information (as those terms are defined under California law). The Service Provider does not sell your personal information. You will not be discriminated against for exercising any of these rights. Where

required by law, we will not use your personal information for materially different purposes than disclosed in this policy without providing you notice and, where required, obtaining your consent.

9. European Economic Area (EEA) & International Transfers

If you are located in the EEA, UK, or Switzerland, your information may be transferred to and processed in countries outside of that region, including the United States. Where this occurs, we rely on appropriate safeguards, such as the European Commission's Standard Contractual Clauses (SCCs) or an applicable adequacy decision, to protect your information.

10. Third-Party Service Providers

The Application relies on the following third parties to operate:

- Apple (StoreKit, iCloud) — payment processing and iCloud sync, governed by Apple's Privacy Policy
- Unity LevelPlay — advertising and basic analytics
- Supabase — backend database hosting for the Friends, Groups, and League Tables features described in Section 3
- Resend — delivery of the one-time verification code used for the optional recovery email described in Section 3.4

Each of these providers processes data under its own privacy policy and terms.

11. Legal Disclosure

The Service Provider may disclose information where required to do so by law, such as in response to a subpoena or similar legal process, or where the Service Provider believes in good faith that disclosure is necessary to protect the Service Provider's rights, protect your safety or the safety of others, investigate fraud, or respond to a government request.

12. Data Retention

Information described in Section 1 is generally retained for as long as is necessary to operate the Application, plus up to 12 months thereafter, unless a longer period is required by law. Friends/Groups data described in Section 3 is retained until you request deletion, as described in Section 3.5.

13. Opt-Out

You can stop all collection of information by the Application by uninstalling it. For data covered under Sections 1 and 2, this is generally sufficient, since that information lives on your device or in your own iCloud account. For Friends/Groups data described in Section 3, uninstalling the app does not automatically delete data already stored on our servers — contact lpt_studio@icloud.com to request deletion.

14. Children's Privacy

The Application is rated 4+ and does not knowingly collect personal information from children. Where the Application does collect information (such as the optional recovery email described in Section 3.4), it does so only when a user actively chooses to provide it, and this feature is not directed at children. If you believe a child has provided us with personal information, please contact us at the email below so we can take appropriate steps to remove it.

15. Data Breach

In the unlikely event of a data breach affecting your information, the Service Provider will take reasonable steps to investigate and, where required by applicable law, notify affected users.

16. Changes to This Policy

This Privacy Policy may be updated from time to time. Any changes will be reflected by an updated "Effective date" at the top of this policy. Previous versions will be made available upon request. Your continued use of the Application after a change becomes effective constitutes acceptance of the revised policy.

17. Contact Us

If you have any questions about this Privacy Policy, please contact us at:
